PREFACE

A PORTRAIT, the late John Singer Sargent is reported to have observed from the fulness of his great experience, is a picture of someone with something wrong with the mouth. In like fashion it is perhaps not too much to say that a bibliography is often regarded by its more critical users as a list of books with something wrong with the references. To such a description this contribution to the historiography of Oliver Cromwell cannot hope to be an exception. It cannot — and no such work can — pretend to completeness, much less to absolute accuracy. It is only as nearly complete as the time and talents of its compiler can make it; and its chief claim to recognition must, therefore, rest on the fact that it is, at least, the largest collection of titles relating to Cromwell which has yet been made, and the most nearly complete list of portraits yet brought together.

It seems an appropriate time to issue such a work as this. The stream of Cromwellian literature, which took its rise in the seventeenth century and then grew to such huge proportions, which dwindled somewhat during the eighteenth century and swelled again so greatly during the nineteenth, has shrunk so much in the past few years that it is perhaps fair to assume that the great bulk of such literature has appeared. As we shall probably not learn much more about the Protector than we know now, so we shall almost certainly never see again an amount of publication regarding him comparable in either extent or value to the material here listed. Cromwell, therefore, offers a peculiarly good subject for the bibliographer at this time, as earlier he was a peculiarly good subject for the biographer.

But why, it may be asked, should one be a bibliographer of Oliver Cromwell at all; why should he trouble himself with such dull, stale, flat, and, above all, such unprofitable labor as collecting and arranging the writings of others on this or, indeed, on any subject? Of what use is it; who will be interested in it; of what possible benefit or entertainment can it be to anyone?

He who publishes a book has been recognized at least since the time of Job as one who gives a hostage to fortune; and whether a bibliography be regarded as a book or not, it offers an even larger mark for attack than most forms of published matter. It is more or less on a par with a dictionary, and as long ago as Dr. Samuel Johnson's day that same problem presented itself to the great lexicographer. "I knew," he wrote in his introductory letter to the public regarding his Dictionary, "that the work in which I was engaged is generally

considered as drudgery for the blind, as the proper toil of artless industry, a task that requires neither the light of learning nor the activity of genius, but may be successfully performed without any greater quality than that of bearing burthens with dull patience and beating the track of the alphabet with sluggish resolution." It is in the face of some such spirit that the bibliographer, like the lexicographer, approaches his task; and though his contribution may be even less appreciated than that of the dictionary-maker, it may, none the less, claim a place in the long line of contributions to human knowledge, in the hope that it may not be regarded as utterly inconsequent and vain.

For the answer to the question, "What use is a bibliography?" lies partly in the minds of that few and feeble company on whom rests the burden of maintaining and increasing knowledge — the scholars who busy themselves with that fascinating if thankless task on which depends, after all, so much of what we call civilization. That answer is obvious enough. However great the sum of human knowledge, if that knowledge lies in unlisted and chaotic masses it is of relatively small account, for each investigator as he comes along must do an enormous amount of needless searching for such parts of it as he happens to need. It is as if libraries had no catalogues, nor had their books properly arranged on shelves; as if our languages had no dictionaries; as if the merchant's goods lay here and there in mixed heaps on the floor; as if there were no maps to guide the traveller. This lesson has long since been learned by scientists, and no one familiar with those great compilations in which are collected and arranged the fruits of scientific investigation but must regret that history, which professes the scientific spirit, and which of all subjects needs bibliography so much, has so little of it.

But even scholars — or perhaps scholars most of all — may note included here much that must seem of trivial interest or none. Fantastic speculation as to what became of Cromwell's head or other personal possessions, his gloves, his swords, his baby clothes — who cares what became of them; or who has any interest in insignificant lucubrations in regard to him by insignificant individuals in insignificant corners of the earth?

The answer to these questions lies beyond the view of even scholarship, in that curious realm of man's imagination which is touched by such things as these more than by facts of history. Lincoln's axe, Marie Antoinette's fan, Washington's false teeth, Louis Philippe's shaving-set, Queen Elizabeth's dresses — the museums of the world are full of these faintly, and sometimes more than faintly, ridiculous relics of the great, as the pages of literature are strewed with trivial recollections of no more consequence. They are not merely a measure of the effect of greatness on the common mind: they bring that mind

in closer touch with greatness in ways that it can understand. Such things are not irrelevant in a bibliography. Nothing is irrelevant in a bibliography that pertains in any way to its subject — for who can tell his neighbor's needs and his desires in the field of human interest?

And in another way they are significant. They reveal not merely that the interest in Cromwell is widespread and intimate, but that his memory occurs to men in many forms and, above all, in times of crisis, in curious, perhaps prophetic, even superstitious ways. It will be seen in these pages that the years preceding the French Revolution witnessed a growing interest in Charles I's trial and execution, long before it seemed remotely possible that such a fate might overtake Louis XVI. The nineteenth-century era of reform was preceded and accompanied by scholarly resurrection of the Cromwellian period. The last years of that century found imperial Germany concerned with Cromwell's contributions to the art of war and his adventures in the field of "Politik," especially "Welt Politik." And how shall we interpret the bitter attacks upon his memory by Socialists at the beginning of the twentieth century?

As to the work itself, the great problem of any bibliography — once the material is accumulated — is one from which even the lexicographer is relatively free. It is the problem of selection and arrangement; and the question of selection of Cromwelliana is peculiarly difficult. To repeat every title relating to his period, especially those of contemporary pamphlets, not only would lead directly to infinity, but would duplicate admirable lists already in existence. To omit all titles so listed would, for obvious reasons, be equally unfortunate. In general, there is included here contemporary material which relates directly to Cromwell or seems likely to have come under his personal notice; from the rest such has been selected as seems to bear more immediately on his career, his character, his opinions, his acts and policies; and that which relates to the more general events and interests of his time has been largely omitted. That this more or less arbitrary procedure will satisfy anyone it is perhaps too much to hope; but, after exploring every other alternative that suggested itself to the compiler and his advisers, any basis of selection except that of personal relation to the Protector seemed quite hopeless; and this is, in consequence, essentially a bibliography of Oliver Cromwell. Yet it may be hoped that by including some items connected with almost if not quite every phase of his career, with references to such printed lists of books as relate to them, the whole may form at least an introduction to the bibliography of his time as well as of his person.

In some measure this task of selection has been lightened, in some measure complicated, by these existing bibliographies, especially by such an admirable and comprehensive list as the Thomason Tracts.

While it has not been possible, of course, to include here every work that mentions Cromwell's name, there will be found here the titles of the more important histories that touch on his activities, with some which may seem unimportant, but which, for one reason or another, seemed worthy of note. Nor has it seemed possible in a work of such scope to evaluate fully every item. In many cases the title itself has been considered sufficient indication of the character or the contents of the work. In a few instances it has been impossible to discuss the matter *in extenso;* but in most cases where evaluation seemed necessary, or doubt might exist, some description has been given, and, with the full index and the use of copious cross-references, it is hoped that the information given may be sufficient.

Finally, it would not be fitting to conclude without acknowledgment of the contributions of those who have assisted in the preparation of this list. To Mrs. Paul Faude and Mrs. J. B. Crane, who have done the most to give it form; to Mr. G. B. Ives, and especially to Mrs. E. G. Stewart, who read the proof; and to the trustees — and above all the donors — of that peculiarly enlightened benefaction, the Milton Fund of Harvard University, whose generosity made its completion possible, is due the chief gratitude of the compiler. To the authorities of the libraries of Harvard and Yale Universities, of the Boston Public Library and of the Boston Athenæum, of the Library of Congress, the New York Public Library, and the Massachusetts Historical Society, he is indebted not only for the use of books and catalogues but for advice and assistance. Nor can anyone interested in such work as this omit his tribute to the compilers of that unparalleled storehouse of bibliographical information, the catalogue of the Library of the British Museum. With respect to the portrait list, he must acknowledge especially the work of Mrs. Faude. Finally, the encouragement and suggestion of Professor Sir Charles Harding Firth have been at once a help and an inspiration.

It should perhaps be noted that limitations of space seem to make it necessary to confine this list to works of historical fact, and that a large list of works of imagination—novels, poems, and plays—has, with some few exceptions, been omitted. And it is possibly worthy of note that there have been inserted here some Cromwell items that for one reason or another have been omitted from the last edition of Carlyle's *Cromwell* by Mrs. Lomas, to whose extraordinary diligence and accuracy every student of the subject, the compiler of this bibliography especially, owes so much. All of Cromwell's letters and speeches, save those indicated, are to be found in her edition.

To revert, then, to Dr. Johnson, one may quote him in conclusion. "We are taught by the great Roman orator that every man should propose to himself the highest degree of excellence, but that he may stop with honour at the second or third; though therefore my per-

formance should fall below the excellence of other dictionaries, I may obtain at least the praise of having endeavored well, nor shall I think it any reproach to my diligence that I have retired without a triumph from a contest with united academies and long succession of learned compilers. I cannot hope in the warmest moments to preserve so much caution through so long a work as not to sink into negligence, or to obtain so much knowledge of all its parts as not frequently to err by ignorance. I expect that sometimes the desire of accuracy will urge me to superfluities, and sometimes the fear of prolixity betray me to omissions, that in the extent of such variety I shall be often bewildered and in the mazes of such intricacy be frequently entangled, that in one part refinement will be subtilized beyond exactness and evidence dilated in another beyond perspicacity. Yet I do not despair of approbation from those who, knowing the uncertainty of conjecture, the scantiness of knowledge, the fallibility of memory and the unsteadiness of attention, can compare the causes of error with the means of avoiding it, and the extent of art with the capacity of man."

Such, making allowance for the difference of the task, must be the compiler's apology; and he can only hope that the work thus begun may be carried on by other hands; that the whole array of *addenda*, *corrigenda*, and *delenda* may be enlisted to make the knowledge of Oliver Cromwell at least as accessible as that of British lepidoptera or North American echinoderms, to neither of which — such is the vanity of historians — he conceives it to yield in importance or in interest. If this work, then, may serve in any degree to contribute by precept or example to that more exact knowledge of the past which historical science seeks to obtain, its purpose will be served. As for the rest it will appear to many, and no doubt properly, as did Gibbon's *Roman Empire* to his noble friend: "Another d——d thick square book eh! Scribble, scribble, scribble, eh! Mr. Gibbon!"

INTRODUCTION

THE HISTORIC CROMWELL

TO ANY thoughtful person interested in history there must occur one question of importance, not only to history, but to all knowledge. How do we know what we profess to know? By what process has that knowledge been built up; on what foundations does it rest; in how far does it represent the truth; and in how far is it tradition or opinion, or mere hypothesis? To many, indeed, even to some professed historians, this question does not seem to have occurred; or, if it has, it has been dismissed as too vague, too difficult to determine, too "unpractical" to undertake without a study of such inordinate length and unsatisfactory conclusions as to repel the most patient of scholars and the most long-enduring of readers — if, indeed, there are any long-enduring readers left.

Yet such studies, however difficult and inconclusive, have not been found either useless or uninteresting to science, with which history nowadays professes to be allied, or even to literature, to which it was once supposed to be related. To know how knowledge has developed provides a measure at once of its achievement and of what remains to be accomplished. It reveals the methods of intellectual progress — that strange combination of investigation, imagination, industry and chance; nor is it without a fascination of its own, apart from that of the subject with which it is immediately concerned.

For such a study the development of the historic Cromwell offers certain advantages. The great Protector occupies a place in modern history second perhaps only to that of Napoleon; and he represented or opposed causes and parties that still play their part in affairs perhaps even more than did the Corsican. He lived in times when it was possible to make and preserve an ample record of human activities, and his period yields in interest and importance to no other in English history and to few in the history of any people. Moreover, however much we may add to the knowledge of his period, we are not likely to know much more of him personally than we do now. The story of the slow evolution of our knowledge of him and of his times is, in fact, the epic of our recovery of the past in miniature, and the career of the Huntingdon squire who rose to be the Lord Protector of England, Scotland, Ireland, and the dominions overseas — he whom we call Oliver Cromwell, though his family name was Williams — is scarcely stranger than the career of his memory once he had passed from life to history.

When Oliver Cromwell died, the world in which he played so great a part knew as much and as little of him as we know of the men of our own time. Week by week the newspapers, which had begun their great career almost if not quite in his lifetime, had chronicled the events of war and politics then reckoned their chief excuse for existence; and more than at almost any other time masses of ephemeral though serious literature had poured from the presses, informing, arguing, praising or denouncing him. Among the thirty thousand pamphlets that tradition says this period produced, a multitude owed their origin to him; and speeches, letters, ordinances, proclamations, petitions, and treaties made him on this side, if on no other, the best-known ruler of his time.

There were, besides, many who had known him personally — but to what purpose for historians? Most of their knowledge was bound to perish with them — and what has history to offer in its place? The lively impressions of contemporaries, the intimate knowledge of events and characters — what is more obvious than that we cannot know such a man as Cromwell as well as those who knew him at first hand? Yet consider "contemporary history" — almost without exception it is dull and disproportioned, superficial, prejudiced; and lives written by contemporaries are divided between panegyric and depreciation. This being true, what can a revolutionary leader in particular hope from his own generation or its immediate successor?

He may expect just what Cromwell received. The characteristic product of the Protector's lifetime was Ricraft's *Survey of England's Champions and Truth's Faithful Patriots*, and it serves for all. It reads like what we know as "campaign biography." Introduced by the weak verses of John Leycester, that "poor crumme of mortality," as he calls himself; adorned with "lively Pourtraiture" and lists of victories of those "prosperous Armies raised for the preservation of Religion, the Kings Majesties Person, the Priviledges of parliament and the Liberty of the Subject," far down the list — next to the last, in fact — of these brief sketches comes that of the "Religious, successful and truly Valliant Lieutenant General Cromwell," "who for his gallant actions, the Cavaliers have (Anabaptist-like) rebaptized (if I may properly so say) and given him a new name, called *Old Iron Sides*." Thus Ricraft sets the pattern for Cromwellian biography, reciting the list of his victories, from the skirmish at Stamford, through the "never to be forgotten fight at Marston Moor" and Naseby, where he "did bravely perform the day," till he returned from Oxford and the West to "take his place, as a Member of the House of Commons, where I leave him to act by his counsell, according to the pattern he hath acted with his hands."

So, when he died, the first account of him, prefixed to a rude engraving of his lying in state, followed that pattern.

Oliver Cromwell L. ptor of Engd Scotd and Ierld borne at Huntington of the name of Williams of Glamorgan and by K. H. 8 changed into Cromwell was educated at Cambridge afterward of Lincons Inn at the beginning of the Warres Cp: of a Troop of Horse raised at his owne charge and by the Parlam made commander in cheefe reduced Ierld and South Wales, overthrew D. Hambletons Army the Kerkes Army at Dunbar reduced all Scotland defeted Ch: Stewards Army at Woster . . . Was declared L: ptor of Ed Scd and Ird 26: of Decemb: 1653. died 3 Sep: 1658 after 14 dayes sicknesse of an ageu with great assurance and serenitie of minde peaceably in his bed. Natus 15 Ap: 1599.

Then, as an afterthought, or because there was one line left, was added casually, "*Dunkerke in Flanders surrendred to him 20th of June. 1658.*"

Such was the recorded history of Cromwell at his death. All men knew him as a small landowner who had risen to the headship of the state; in politics, as in war, his every action attended with success. They recalled the steps of his ascent to power, the roll of his victories over Royalists, Irish, Scotch, and finally foreign foes; how he had overcome opponents in his own party, lukewarm aristocratic leaders, Levellers, Presbyterians, Parliament itself; furthered the execution of the King, the formation of the Commonwealth and the Protectorate; and, as dictator of the Empire of England, had become the most formidable figure in the European world, the Puritan hero and the Protestant champion.

All this they knew, for it had been the fabric of affairs for nearly twenty years. What they did not know was how it had been done, and why—the springs of action, the motives and machinations, the circumstances that he had faced and overcome. Not until the graves gave up their memoirs and the archives their documents, and their stories were compared; not until the great underlying currents of thought and action had been sounded and charted, would they know what part he played, and what sort of man he was.

Yet there was plenty of material. Of his own letters hundreds were preserved; of the letters of others many thousands more; the archives of foreign powers held the reports of agents and ambassadors regarding him and his country; those of Great Britain, masses of documents relating to his rule. His secretaries, Thurloe and Milton and Rushworth in particular, had kept their correspondence; his opponents, theirs. In many a country house, in many an old bookseller's shop, lay masses of pamphlets, and even before his death men were collecting them. Especially a certain George Thomason of St. Paul's, as he went about his business among authors and printers, had gratified his collecting instincts and his interest in affairs by picking up these fugitive publications against the time when his professional judgment told him they would interest posterity, till he had gathered some twenty-three thousand of them to perpetuate his own memory with that of his times.

Even while this bookseller of St. Paul's went his unobtrusive way, the young Prince Charles's governor, Sir Edward Hyde, in his retreat among the Channel Isles, began to draw from his own recollections, from the state papers which he knew so well, — for he had written so many of them, — from his diary and correspondence, the story of the Great Rebellion and the Civil War. Meanwhile, too, the secretary of the Long Parliament, Thomas May, was publishing his history of that body to 1647; and various other men who had played parts in public life were busy writing their recollections or their *apologiae*. But to these men, for whatever reason, such documents were dangerous, especially to Cromwellians when in that *annus mirabilis* of 1660 King Charles II came to his own again; and each took steps to protect himself. Thurloe and Milton abstracted their letters from the Public Paper Office in Whitehall and hid them. Thomason stored his pamphlets in false table-tops; and even when Clarendon came back as Chancellor, he did not rush into print with reminiscences, for "indiscretion" was then a term of reproach and not, as now, a boast. So Cromwellian material went into hiding, for men feared what its possession might entail to them, a fear not lessened by the execution of the regicides.

Thus one who in those days aspired to write a life of the Protector had little more to guide him than common knowledge and the public prints, with what he might gather from the actors in affairs. Yet then, as now, no ignorance or half-knowledge proved a bar to authorship, and Cromwell was scarcely buried when biography began. In it three books are notable. The first — for despite its brave title, Dawbeny's comparison of Cromwell's career, his character, and even his appearance, with those of Moses, is no biography — was Samuel Carrington's *History*. Adorned with a portrait and "That never till now published incomparable Poem of the English Virgil, Mr. Edmund Waller," on Montagu's victory, it formed, in its author's words, a "natural panegyrick" of its subject, without adding appreciably to the knowledge of his life. But panegyric was unfortunate, for the little book was scarcely published when Richard Cromwell, to whom it had been dedicated, fell; and Carrington's volume accompanied him into obscurity.

It was followed within a twelvemonth by *The Perfect Politician*, usually ascribed — on what seem slender grounds — to its booksellers, Raybould and Fletcher, and usually known by the latter's name. In turn it was short-lived, and was soon supplanted by a far more famous book, James Heath's *Flagellum*, a contribution of no small consequence to Cromwellian biography. This owed its popularity to reasons far outside its merits as a truthful history, and not least to its style. Where Carrington began prosaically enough, "My intent is to give you a rough draught of this most excellent Personage," and

Fletcher still more abruptly, "It is very well known that he was of an honourable Extraction," Heath strikes a note of true grandiloquence.

> Fate [he begins], when it had decreed and ordain'd the unhappy birth of this *Famoso*, by her most secret and hidden malice brought him into the world without any terrible remark of his portentous life, neither Comets, nor earthquakes, nor such like Violences of Nature, ushering or accompanying him to the declaring and pointing out, that the Scourge of the *English* Empire and Nation was now born; as she did by indiscernible methods train him up to the possession of the Throne, and as secretly and cunningly, after all his bloody and nefarious actions, shift him out of it and with a blast of her spent Fury, turned him into his wish'd for Grave.

Which is to say, apparently, that Cromwell was born and died like any other man.

Moreover, Heath devoted much of his book to Cromwell's youth, perceiving in it the prophecy of the later criminal. "Of a cross and peevish disposition," unrestrained by his mother's fondness, "rough and intractable," "robust and outragious in his juvenile years, adult and Masterless at Mans estate," the young Cromwell was a robber of orchards and of pigeon-cotes, a "veritable *Apple-Dragon*," thus preparing to ravish the "*forbidden fruit of Soveraignty*." Insolent and incorrigible as he grew to manhood; at college a cudgel and football player, ignorant of Latin and leaving without a degree, he was sent to Lincoln's Inn, where his debaucheries might be obscured in the city's general wickedness. Returning thence to plague the countryside, a terror to maids and alewives, "a veritable Tarquin," a friend of tinkers and pedlars, a player of filthy tricks, he was disowned by his uncle Oliver. Then, left a legacy by another uncle, and marrying Sir James Bouchier's daughter, he became a farmer; grew religious and "eminent for Puritanism"; paid his debts punctually; even "grew so cunning as to comply with those modes of Kindnesses and . . . Friendships" which brought him "very much in the esteem of the best of the Faction," or "the Household, as they then termed the people of the Separation." He was a "stickler against Ship-Money" and the Scotch war, and so finally came into the Long Parliament by favor of a Cambridge alderman, one Tims, as "one Viper more to the exenterating of her bowels."

Thus fairly launched, Heath spends near half his volume on the rise of this monster, till "The Power was emptied from one Vessel to another," and Cromwell, having "passed and surmounted all the difficulties and troubles that the interest of the Crown had hitherto threatened," became Protector. Once in power, one sentence suffices for the Dutch war, whose success, like that of Dunbar, is attributed to Monk. Another does for Cromwell's dealings with the Northern Powers; scarcely more for intervention in behalf of Continental Protestants, the treaty with Mazarin, and the war with Spain. "I must omit,"

Heath says naïvely, "the successes by Blake . . . and Sir Richard Stayner"; and Dunkirk's surrender he feels constrained "to pass without further remark." Cromwellian legislation scarcely fills a page, and though Heath lingers long over Cromwell's complicity in plots against his own life, it is only when he reaches matters of real importance that he grows voluble. The Protector's "Guard of Halberdiers in gray coats welted with black velvet," his "Drol discourse," his mode of life, with the descriptions of his inauguration and his funeral, fill near as many pages as the story of his rule. Thus what the newspapers of his day omitted, Heath supplied, following, or founding, that great journalistic principle of giving the people what they want — abuse and personal gossip; and, based on these unfailing recipes for popularity, it is small wonder that his book was a success.

Had Restoration knowledge been confined to these, it would have been a barren epoch in Cromwellian historiography. But no such period of civil war fails to record itself in memoirs and recollections as well as in official correspondence, and it was hardly possible to write much about it and leave Cromwell out. So when Sir Philip Warwick published his recollections, and the Duchess of Newcastle an apology for her husband; when Monk's chaplain wrote his patron's life; when Aitzema chronicled the Anglo-Dutch war, and Meadowes and Manly the history of the Northern Powers, they contributed indirectly and unconsciously to Protectoral biography.

But the greatest contribution was neither indirect nor unconscious, for in 1659 John Rushworth began to publish his *Historical Collections*. Few men were better qualified to recall the past. One of those characters invaluable to historians who appear at every great crisis, Rushworth, bred to the law, had busied himself in attending political and judicial proceedings and making notes of them. Appointed assistant clerk of the Long Parliament, he was on duty when the King came to arrest the five members. He reported Strafford's trial; then, as messenger between the King and Parliament; as secretary first to Fairfax, then to Cromwell, and finally to the Council of State; as a member of Cromwell's parliament; in the service of Richard, and finally of the Rump, he went everywhere, knew everyone, and heard almost everything, and set down most of it. Thereafter, through more than forty years, the memoranda of this great reporter of the Puritan Revolution found their way to print, the first and still one of the greatest contributions to its history.

Not to the satisfaction of the Royalists, who, declaring that he had omitted or suppressed much evidence favorable to their cause, commissioned the Reverend John Nalson to gather documents on the other side. To him the Duke of Ormonde sent Irish material; Lord Guildford, the Earl of Manchester's papers. Charles II gave him access to the state archives; and he collected a huge mass of notes, whose

fate is characteristic of historical material. From them he published two volumes, with a shorthand report of the King's trial; then he died, with his story told only to 1642. His notes disappeared. Some found their way to the hands of that omnivorous collector, Dr. Tanner, and finally to Oxford University; some, after a century of wandering, came into public hands; and, two hundred years after Nalson died, some twenty volumes of them were discovered in the Duke of Portland's library at Welbeck, too late to serve their author's purposes.

Such were the earliest efforts to recover the documents of the period; and just before Rushworth's third volume appeared, the first of the Cromwellian memoirs saw the light of print — Bulstrode Whitelocke's *Memorials*. Eminent in affairs, an able lawyer, sometime ambassador to Sweden, honest, well-informed, he made a solid contribution to the history of his times. Accompanied and followed by more unconscious contribution to Cromwellian historiography, — this time chiefly from Ireland, where Cox's history provided some account of Cromwell's activities in that island and Petty recorded some of its results, — by the time of the Glorious Revolution of 1688 a beginning had been made in gathering material for the Protector's history.

That period took it a step forward. Four years thereafter the bookseller-author, Richard Burton, published the most popular of English lives of Cromwell, notable in that it followed Carrington, not Heath, thus fixing, as it were, the canon of Cromwellian biography; but only, as it chanced, for Englishmen. For on the Continent meanwhile, Gregorio Leti's *History . . . of the Life of Oliver Cromwell . . . Tyrant without Vice, Prince without Virtue* captured the European fancy and held it for a century. The reasons for its long success are obvious. It provided an elaborate and picturesque account of a prodigious life; a selection of documents, chiefly from Milton, to give it verisimilitude; a genealogy and even a new birth-year (1603) for the Protector. Still more, it now endowed him with a youth of such appalling piety that at five he knew more hymns and prayers than others knew at ten, took such pleasure in sermons that he seemed destined inevitably for the church, and "What a happy disposition for the episcopate!" says the enraptured author. At ten he had "a tincture of mathematics and philosophy"; at twelve he went to Cambridge to pursue the higher sciences. There he attracted Archbishop Ussher's attention; and Bishop Bayly of Bangor seems to have made a special pilgrimage to view this prodigy, "the admiration of the world," whom any professor would have been glad to have as a disciple, and who at seventeen, after six years of college, "possessed perfectly both mathematics and philosophy." One need scarcely pursue the later history of this amazing youth through Leti's thousand pages to perceive that the age of fable was not past in the late seventeenth century, or pause to meditate imaginary conversations between Heath and Leti in Elysium.

The English lacked this masterpiece of historical imagination, but they had their compensation, for as the revolutionary century waned, its controversies entered into history. The narratives of the "Presbyterian Pope," Richard Baxter, and the Republican regicide, Edmund Ludlow, weighted the balance against their common enemy. The memoirs of Denzil Holles, the political Presbyterian, impugned Ludlow's veracity; each provoked retort from Royalists and Cromwellians alike, and thus began the age of controversialists.

It was illumined by one great event. In the first year of Queen Anne's reign there finally appeared the great classic of the Cromwellian period, long hidden from the world, Lord Clarendon's *History of the Great Rebellion and the Civil Wars*. The product of the "inexhaustible impulse to work" of a statesman who had spent half his lifetime in exile, with its magnificent periods and its quality of genius, it "fixed the circle of ideas for the English nation" for a century and a half, and from its time the measure of contributions to Cromwell history was in no small degree their relation to the work of Clarendon. It not merely evaluated the characters and the movements of the period. It supplied a store of documents to supplement Rushworth and Nalson; and was in turn supplemented by Rymer's collection of treaties, which added some knowledge of Cromwellian diplomacy, and Walker's *Sufferings of the Clergy*, which became the Anglican martyrology. In such fashion the Age of Anne made its contribution to the memory of Cromwell.

Yet Cromwell himself was known but indirectly; it remained for Hanoverian England to recover him. Its earliest effort was that of Rapin de Thoyras, the Huguenot refugee and follower of William of Orange, who, in an endeavor to explain to the Continent the people and the Revolution that had brought his master to the English throne, issued the first volume of his History in 1723. Translated into English, it was continued by the deists Toland and Tindal and the novelist Smollett. In its pages Rushworth and Nalson, Whitelocke, Ludlow, Baxter, and Clarendon, and many more besides, had each his day in court; and for the first time the world had a substantial, connected, documented, and relatively impartial narrative of the seventeenth century, the most widely read and popular history for more than a generation.

In a sense Rapin opened a new era. The age of Whig history had begun. Within a twelvemonth were published Burnet's *History of my own Time* and Oldmixon's attack on Clarendon, which he called a "critical" history of England. With these appeared the best biography of Cromwell yet written, whose author, one Isaac Kimber, a "General Baptist" minister, first ventured to print some of Cromwell's own letters, and so began another era of Cromwellian biography.

This development was presently reinforced by a new movement, not, indeed, historical, but of much influence in that field. In 1731 was founded the first English periodical of consequence, the *Gentleman's Magazine*, soon followed by the rival *London Magazine*. In their pages were embalmed an amazing number of references to Cromwell and his policy, derived from the contemporary journals, whose supporters found in the great Protector's foreign policy a convenient club to beat Sir Robert Walpole, then bent on keeping peace. Then as his ministry wore to a close, this was accompanied and followed by an unparalleled burst of publication relating to the revolutionary period and its great figure.

In quick succession, appeared Neal's *History of the Puritans* and its *Examination* by Grey; Peck's extraordinary collection of tracts, memoirs, letters, wills, and epitaphs, which he called *Desiderata Curiosa;* Birch's *General Dictionary;* Carte's edition of the Ormonde papers; a general collection of State Trials; the first volumes of the journals of the Lords and Commons, whose first editor, oddly enough, was the novelist, Dr. Richardson; Thurloe's state papers; those of Milton; the Sydney papers; the "old" Parliamentary History; and collections of tracts from the libraries of Lord Somers and Harley, Earl of Oxford. It is a most imposing list, quite overshadowing even the new life of Cromwell by John Banks, the first openly favorable biography of the Protector.

What was the cause of this outpouring of source material for the Cromwellian period? It was due in part to the fact that it was now safe to print it; but still more to the activities of two kinds of men who for a half a century had been collecting it. The first were the collectors proper, those great gentlemen who found refuge from politics in their libraries. High among them stood Sir Robert Harley, Earl of Oxford, who, known to history as a great Tory leader, deserves still greater reputation from historians. Thousands of manuscripts salvaged from monastic spoil, a hundred thousand books, and more than three times as many pamphlets filled his shelves and those of his son. Next to him stood his rival, Sunderland; the Whig Chancellor, John, Lord Somers; and beside them, still others of this noble company.

They were accompanied, assisted, and followed by another set of men, peculiarly characteristic of the eighteenth century, the antiquarians, among whom the names of Hearne and Tanner, Birch and the brothers Rawlinson, were conspicuous. Seldom has any country seen such a group at the same time. Unknown to fame beyond the narrow bounds of scholarship, without them we should know little of our past. They fell on happy times. Where the pedantic James I had perceived a danger to his throne in the meetings of their great predecessors, Camden and Cotton and Leland, and forbidden them, the Hanoverians, known to history as dull and ignorant men, perceived

no such danger. George I chartered the Society of Antiquaries, which they founded. In time George III gave it quarters in Somerset House; and chiefly from its members proceeded this illumination of the past.

But where had collectors and antiquarians found their documents? The story of the Thurloe papers may suffice to show. Superior even to Rushworth in his opportunities as foreign secretary to the Protector, head of an unrivalled spy system, the most trusted of the Cromwellian advisers, Thurloe had made his peace with Charles II's government; but when he died, not even Clarendon, to whom he rendered useful services, knew where his papers were. To all appearances the secret perished with him. But a full quarter of a century thereafter, the then owner of Thurloe's chambers in Lincoln's Inn loaned them to a friend in vacation, and that inquisitive clergyman discovered a false ceiling in the attic and behind it Thurloe's documents. Thence they passed to Lord Somers, thence to his brother-in-law, Sir Joseph Jekyll, Master of the Rolls, thence to a bookseller, Gyles, from whom Rawlinson got some; and, in due course of time, the rest came into public hands.

Such was the career of many such collections. But as the great collectors passed from the scene of their activities, what was to become of their accumulations? One answer was at hand — the universities; and to Oxford the papers of Carte and Clarendon, Tanner and Hearne, in due time found their way. But the Harleys' were bought by a bookseller, Osbourne, and seemed likely to follow Rawlinson's to the auction-room and so be dispersed into original chaos. By the mid-eighteenth century the problem was acute; but a new remedy was found. Among these great collectors the fashionable London physician, Sir Hans Sloane, was eminent. When he died, he left his treasures to the nation in consideration of a payment to his estate of £20,000. An act of Parliament authorized a lottery to raise that sum, with an additional amount to buy the Harleian collections and house them. To these were added those of Sir Robert Cotton, and in 1757 George II presented the new foundation with the royal library, which included Archbishop Cranmer's books and many more besides. Two years later Montague House, bought for this purpose, was thrown open to the public, and the British Museum was an accomplished fact. Its foundation was thus coincident with the Seven Years' War and with the Peace of Paris, which brought it to a close; George III gave it the Thomason collection which, after vicissitudes scarcely less romantic than those of Thurloe's papers, found finally a safe resting-place.

In such fashion the age of institutions succeeded that of private collectors and antiquarians. Nor is it, perhaps, unworthy of note that it was marked by the first volumes of Hume's *History of England*,

which found their inspiration in the Stuart period and replaced the Whig Rapin's account with one more suited to Tory proclivities. Still more important for Cromwell's life, Harris, following the precedent of the periodicals, included in his biography of the Protector his letters and orders now emerging from the obscurity of a century. The publication of Cromwellian material now became, indeed, a characteristic feature of both periodicals and histories, and found its chief exponent in Mark Noble's monumental *Memoirs of the Protectoral House of Cromwell*, whose very title reveals the altered state of his biography.

Yet even this landmark revealed, as well, its great deficiencies. Much had been published about Cromwell; but the great mass of evidence remained — preserved in safe places, but in what a state! Uncatalogued, or listed in wretched calendars, it remained for a new type of man to carry on the work of the collectors and the antiquarians. This was the cataloguer; and among such the name of the Reverend Samuel Ayscough must hold high place in the minds of that small and obscure fraternity concerned with the invaluable, little-recognized, and less-rewarded task of making knowledge available. The indexer of those reservoirs of eighteenth-century life and letters, the *Annual Register*, the *Gentleman's Magazine*, and the *Monthly Review*, the author of the earliest concordance to Shakespeare, and of the first catalogue of books in the British Museum, he set himself to catalogue the undescribed manuscripts in that growing collection, and make them available to students. Following him, a Scotch doctor, Robert Watt, compiled a monumental catalogue of pamphlet literature, the *Bibliotheca Britannica*, and thus opened another field to historical scholarship. And it is an ironical reflection upon our self-complacence that on the labors of such humble men as these depends so much of our knowledge of the great ones of the world.

With the French Revolution and Napoleonic wars, among infinite parallels between Cromwell and Bonaparte, came a new burst of interest in the seventeenth century. Drawing upon the work of the collectors and the cataloguers, the compiler of new Parliamentary history which goes under Cobbett's name, James Caulfield, made the chief contribution to Cromwellian biography. From the newspapers in the Thomason collection he extracted the notices of the Protector in a volume entitled *Cromwelliana;* and to this mass of information, that all but forgotten prodigy of learning and public spirit, Baron Maseres, presently added a collection of tracts to supplement those of Harley and Somers.

Still more important to the cause of history was another force. In the first years of George III's reign, three gentlemen, taking advantage of the great interest in historical collections, secured a commission to catalogue and arrange the public documents. By 1800 it was evident that, after the manner of many such ingenious gentlemen,

they had done little but draw salaries for a new sinecure. In consequence they were replaced by a Keeper and Register of Public Documents, who embarked upon the task of setting in order these huge accumulations, which had long attracted and infuriated antiquarians. As the Napoleonic period wore to a close, this work was reinforced by another agency. The sale of the Duke of Roxburghe's collections revealed that these memorials might be dispersed and lost, and a new group bestirred itself, in different fashion from the eighteenth century, to preserve them; forming for that purpose the Roxburghe Club, to publish the rarer and more important documents.

From these two circumstances proceeded the earliest advances of the nineteenth century. Beside the publication of such diaries as those of Pepys and Evelyn, two lives of Cromwell by his descendants, notable for their documents, and the work of the French historian, Guizot, whose series of the memoirs of the revolutionary period is still the most complete, these great collections began to influence history. From the pamphlet literature Godwin drew much of the matter of his *History of the Commonwealth;* and in 1825 His Majesty King George the Fourth gave — or sold — his father's collection of 80,000 volumes to the British Museum. He was, besides, "graciously pleased" to appoint a royal commission to consider the publication of historical material from that source. In 1829 the commission was renewed, and on February 7 of that year, a momentous date for English historical scholarship, the commission voted that the letters of Cardinal Wolsey to Henry VIII and other like material be printed. With this event the authority and resources of government were at last invoked in the cause of recovering the past.

Meanwhile, private enterprise went on. John Forster's life of Cromwell gathered up materials that had been accumulating for a century; Robert Vaughan drew a history of the Protectorate from the Thurloe papers; Cary wrote his *Memorials of the Civil Wars*, which added many Cromwell letters, from the Tanner manuscripts; and Lister utilized the Clarendon papers for his admirable life of the chancellor-historian. Finally these, with lesser contributions to the Cromwellian story, were crowned in 1845 by the appearance of Thomas Carlyle's *Letters and Speeches of Oliver Cromwell*, the chief landmark thus far in this long historical pilgrimage.

In it was summed up all, or nearly all, of the development of Cromwellian historiography. It was, and it remains, the greatest literary monument to the Protector's memory. Carlyle's principal contribution was the assembling of the material in convenient order and his vigorous plea for his hero; and no one familiar with the period but must perceive that his actual additions to knowledge yield in importance to the emotional stimulus of his "appreciation" of his subject; for virtually all the documents he published were already in print.

The enormous popularity of his work drew from its long hiding a new store of Cromwell correspondence, transmitted to the press, or to him, to be included in his later editions. And, characteristic of the late nineteenth century, there was founded almost at once a periodical to meet that miscellaneous curiosity about the past which has filled the pages of *Notes and Queries* from that day to our own. From its first issue there poured into its columns a stream of questions and answers about Cromwell and his times which form a perfect encyclopaedia of information, chiefly, as is usually the case, about minor points. Still more to the purpose of historians was the progress of publication among the learned societies, which, following the lead of the Roxburghe Club, and its worthy successor, the Camden Society, still further illuminated the Cromwellian period.

Thus firmly established, precisely two centuries after the Protector's death began a new age of Cromwellian historiography, an age that may properly be described as that of the scholars. In 1859 David Masson's monumental *Life of Milton* led the way, soon followed by Leopold von Ranke's *History of England chiefly in the Seventeenth Century*, which opened new sources of information to historians. If this prototype of Carlyle's famous "Dryasdust" did not, as has been humorously said, "invent" archives, he at least pointed the way to the great treasures of the Continent whence his materials were chiefly drawn. And even while his work was coming from the press, Andrew Bisset, in his *History of the Commonwealth*, introduced its readers to the last, or almost the last, of the sources for Cromwellian history, the Domestic State Papers, soon to be made public through the activities of the Public Records Commission.

It is an interesting question as to when we may expect "authoritative" history of a given period. In this age of publicity it may be that one generation will suffice for reasonable accuracy. But it was not until three quarters of a century after his death that enough material was available for an adequate life of Napoleon; and, as we see, it was two centuries before there was sufficient evidence for an adequate Cromwellian biography. Even so, the era of the Puritan Revolution was, historically, a good deal of a wilderness. To clear its undergrowth, to chart its paths, to make it viable and understandable, was the work of Samuel Rawson Gardiner, whose first volume of the *History of England from the Accession of James I* appeared in 1863. Thereafter for nearly forty years he devoted his great talents to this single task; and his epitaph might well be the encomium pronounced upon his work: he found the early Stuart period fable and he left it history.

With prodigious industry and great gift of tongues he uncovered new masses of material in public and private collections in the British Isles, in the archives of Brussels, Paris, Rome, Venice, and Simancas. Scarcely less, he inspired and informed no small part of that tremen-

dous addition to the knowledge of the period that he made his own, partly by the stimulus of his writings, partly by his personal encouragement to other individuals and agencies. Of these the greatest was set in motion six years after his first volume appeared, when, to supplement the labors of the Public Records Commission, there was established a Historical Manuscripts Commission to publish material in private collections; and it is notable that its first publication begins with an illustration of its purposes drawn from the letters of Charles I captured at Naseby.

Meanwhile its sister commission reached the same period, and working side by side, they uncovered an amount of evidence so rich in the Cromwellian period that, to take one instance, Carlyle's latest editor was enabled to add, chiefly from these sources, more than a hundred Cromwellian documents unknown even to his latest edition. Finally, in 1886 was founded the *English Historical Review*, to meet the needs of this expanding profession of historical investigation. To all of these, to *Notes and Queries* no less than to the *Review* of which he became the editor, Professor Gardiner contributed of his vast knowledge; and as the nineteenth century went on, did one not know of the work done in other fields, it might seem that it was devoted chiefly to the elucidation of the seventeenth.

The monographists and the archivists joined in these labors; and education lent its aid, for the training of historical scholars and teachers evoked the doctoral dissertation, which now took its place among the agencies in the recovery of the past. All nations joined this generous rivalry, Scotland and Ireland, Germany and Austria and Italy and France. From points as distant as Nebraska and Japan came men to study Cromwell's policy. Specialists lent their aid to the elucidation of finance and trade, war and diplomacy. The archives were ransacked, the most minute points investigated; historical societies, like those of Massachusetts and Rhode Island in particular, published studies and documents relating to him; even New Zealand sent its contribution of Cromwellian material which had somehow found its way to that far-distant shore. Above all, Professor Gardiner's great colleague and successor, Professor Sir Charles Harding Firth, not merely in his exhaustive study of the Cromwellian army, his continuation of Gardiner's history to its conclusion, his study of the House of Lords during the civil wars, but in his discoveries of new sources of information, like the invaluable Clarke Papers, stands as the dominant figure in the latest phase of Cromwellian scholarship.

Thus the knowledge of the historic Cromwell, like his reputation, reached its height just three centuries after he was born, and the turn of the nineteenth century was signalized, like his death, by three lives of the Protector — but with what a difference! To that task the talents of Professor Gardiner, Professor Firth, and John Morley were

summoned, and each in his way produced a notable biography. In them were reflected the labors of two centuries of scholarship; and the differences between them and the work of Heath and Carrington were no longer matters of opinion. As a result there came into being a new conception of Cromwell and his period, based on more accurate knowledge of the motives and manœuvres of the leaders of both sides than even Clarendon possessed; of the great forces which they directed or by which they were influenced; the circumstances which confronted them, and the results of their activities.

To determine the facts of any given period and set them down in order seems a simple formula to explain its history. But it has not been quite as simple as it seems, for it has meant more than mere determination of the truth — though that was hard enough: it has meant destruction of error, which is still more difficult. The problem of Cromwell was not to be solved by emotion or by argument; it was neither literary nor dialectic in its method; not the determination of "rights" and "wrongs," by justification of one side and condemnation of the other, but the determination of the facts by judicial processes. If this new solution was, as its opponents claimed, merely a subtler method of defending Cromwell than by open championship; if its "cold, dispassionate attitude" was but a more ingenious mask of advocacy, it was not consciously that, nor has that view been generally accepted. Whatever the interpretation of his motives and his character, the facts of the historic Cromwell are now available.

What, then, is the modern story of the historic Cromwell as distinguished from that of Leti and of Heath? In one way it differs little from Heath's chronicle. The main facts of Cromwell's life were seldom in dispute. The problems that remained were, in effect, but two — the grounds of the quarrel between the King and Parliament, with the motives and manœuvres of the leaders of each side; and Cromwell's part in these activities. Was he from his first entry in affairs a shrewd, farsighted, cunning, hypocritical, ambitious seeker after power; or was he a characteristic product of his time and party, led by circumstance and ability to the conduct of affairs? Throughout there is but one issue, that of his character, good faith, motive, or whatever the springs of action may be called. In view of his beliefs and principles, could he have acted otherwise than he did — or were those beliefs and principles genuine?

To that the verdict of history seems thus far in his favor. Admitting the motto of Carrington's biography to be true — that he who knows not how to dissimulate knows not how to rule; admitting that all men have their imperfections, the balance has inclined to Cromwell's side. Nor is this merely because the world has changed, that triumphing democracy has perceived in this undemocratic figure a champion of its cause. It is largely because of the activities of those

who have preserved and interpreted for us all this historical material, — collectors, antiquarians, cataloguers, editors, monographists, and historians, — and so enabled us to reconstruct the period and the man. So, as this last age shifts

> Into the lean and slippered bibliographer
> With spectacles on nose and pouch at side,

we find a different Cromwell from that of the preceding generations. If to each of his biographers the character of the historic Cromwell bears a somewhat different aspect, as his features seemed slightly different to each of the artists who painted his portrait while he was still alive, there remains, none the less, as a result of all these scholarly activities, a figure which we all recognize as Oliver Cromwell, with small chance of error in what he would have called the fundamentals, whether of actions or of character. Who can doubt that, apart from the more favorable estimate, were Cromwell himself to read these later lives, he would prefer them to those of Heath or Carrington or Leti? Who can doubt that, imperfect as all human knowledge is, in history or in any other field, they represent, so far as may be, what we call the truth; or that truth in history is, in the last resolution, the product of what we call scholarship?

OLIVER CROMWELL

From a portrait by Robert Walker, in the possession of the author

Catalogue of Portraits and Satirical Prints

NOTE

None but those who have tried to make even such a tentative portrait list as this can realize the difficulty of that task; nor can this effort to provide a guide to Cromwellian iconography hope to escape errors, omissions, or duplications, even though its compiler has seen most of the items here enumerated, and has many of them. The list owes much to those of the British Museum Catalogue, the Catalogue of the Sutherland Collection, and the Bromley Catalogue of Engraved Portraits. In general the list of satiric prints follows that of the British Museum both in arrangement and — though in abbreviated form — in description, so that there may be as little confusion as possible in identifying particular prints; and grateful acknowledgment is hereby made to that valuable publication for such use of its material.

It has not seemed necessary to enter into any elaborate discussion of the original portraits of Cromwell, since they are tolerably apparent in the list itself. In general it may be said that they owe their origin to three painters, Robert Walker, Samuel Cooper, and, probably, Sir Peter Lely. Such others as those by Bulfinch, Burnet, Romney, and the like, are, of course, imaginary portraits. Of existing paintings the best, and the best known, are the Cooper portrait in Sidney Sussex College, Cambridge, which is to many minds the most satisfactory; the Walker portrait in the National Portrait Gallery; the Holton Park portrait, now in Oxford University; and the miniatures in the Buccleuch collection.

The two portraits used as illustrations to this volume have not been previously reproduced, so far as can be learned; though the second is so akin to the Walker portraits that it seems less unusual than the first. That seems, indubitably, genuinely contemporary and may well be added to the very limited list of such authentic presentments of the Protector.

Busts

1 Marble bust, ascribed to Bernini [but questioned], now in the H. of C. corridor. Bought by Mr. Chas. Wertheimer from Lord Revelstoke's collection and presented to the nation, 1899, in recognition of C.'s treatment of the Jews.

Photogravure, 4 × 5¾ in. B.M. Headpiece in Gardiner's *Cromwell*, 1899. Front. of Firth's *Oliver Cromwell* (1900), p. 312. In *Mag. of Art.* (1898), XXIII, 48.

2 Marble bust by Edward Pierce, jun. (*d.* 1698), owned by E. J. Stanley, Quantock Lodge, Somerset. Terra-cotta model of this is in N. P. G., bought 1861.

Engr. fr. same by Thomas (?). Profile, with very curly hair. Mezzo, 8¼ × 6¼. Reprod. in Cust's *N. P. G.*, p. 132; *Scribner's Mag.* (1896), XX, 324; *Harper's Mag.* (1884), LXIX, 863.

3 Marble bust, *sculp.* unknown, owned by the Earl of Wemyss and formerly by the Byron family at Newstead Abbey.

4 Bronze bust identical with above fine marble bust. In N. P. G., purchased 1877. Reprod. in Cust's *N. P. G.*, pl. No. 438.

5 Another bust fr. death-mask, in N. P. G. Reprod. in Cust's *N. P. G.*

6 Marble bust in Tangye Collection. 'Doubtful value.'

7 Col. terra-cotta bust in Museo Nazionale, Florence.

8 Cast fr. same in N. P. G., bought 1899.

Masks

Life Masks

1 Wax mask owned by Russell family, supposed to have been taken when C. was living. (Noble, I, 304.)

2 Plaster mask in collection of Mrs. Frankland-Russell-Astley at Chequers Court. (*Cp.* Morley's *Oliver Cromwell* (1900), front.; p. 332.)

3 The same, r. profile; in Gardiner's *Cromwell*, 1899. Photogravure, 4¼ in. diameter. B.M.

Death Masks

4 One in Harvard University Library, once the property of Carlyle. Many of these, Carlyle says, "commonly sold in the shops." See index to this bibliography.

5 "A fine plaster cast taken a few minutes after C.'s death, got by Tuscan resident and in Gallery at Florence, of bronze with brassy hue." (Noble, I, 302, 303.) Lord Cork and Bp. of Peterborough who saw it believed it life-mask; Granger, a death-mask; Noble, who saw it, a life-mask. Gives engr. of it from bust owned by Duke of Grafton, "an exact likeness of that at Florence," as the Duke and the Bishop both observed. The Grafton bust is plaster, colored to represent brass.

6 Wm. Bates says he has plaster death-mask said to have been made from one at present in Tower of London. (See *N. & Q.* Ser. 2, II, 32.) [None in Tower.] In Hutton's *Port. in Plaster*, 1894, p. 207.
